

# PHARMAEXPERT™

In a time where public concern is increasing around pharmaceuticals in the healthcare industry, many federal, state, and local authorities are changing the rules on pharmaceutical waste management and disposal. We pride ourselves in offering a comprehensive solution for staying compliant which is easy to administer. Our service includes a customizable six (6) step PharmaExpert™ Program to help create and manage an efficient and compliant pharmaceutical waste management system that is environmentally and financially worthwhile.

## 1) Risk Assessment

Conduct risk assessment to identify facility needs and requirements and to set goals for improvement towards compliance.

## 2. Categorize & Classify

Categorize and Classify – Categorizing and classify your hazardous and non-hazardous pharmaceutical waste which includes formulary classification assistance.

## 3) Plan & Develop

Develop and prepare written plan documents according to site specific customizations. We have the framework which can also be integrated into your current hazardous waste management and disposal program.

## 4) Implement

Implement the plan according to the approved policies and procedures to effectively manage your pharmaceutical waste.

## 5) Training

Develop and conduct site specific employee training to better prepare you and your staff for Joint Commission visits and government inspections.

## 6) Ongoing Support

Provide ongoing process management and monitoring by providing pre-Joint Commission audits to ensure documentation is in order and site is in compliance.

Our PharmaExpert™ solution provides intimate, site specific support based on the facility's required level of compliance. Our job is to lessen your burden by offering the right tools and experience in your support every step of the way.
